SH242 SH260 SH262 SH263 SH264 SH270 SH280 SH281 SH291

Wood shutters are warranted for workmanship. Wood is a natural material and if not properly maintained will deteriorate and rot. Wood shutters must be primed and painted on all sides with a minimum two coats of paint. Shutters must have a minimum 1/8" between back of shutter and wall for air circulation. Slats on wide shutters may move (warp), this is not considered a defect. Checking, splitting, twisting and warping are natural effects of wood when exposed to the elements. There will be no checks or splits upon delivery of the shutters. To minimize this effect after the product is installed on the exterior please re-paint your shutters as weather conditions dictate.

Louver “A” Shutter: Stock

The Style “A” shutter is a classical smaller slat shutter. The “A” shutter is made of clear Ponderosa Pine and it is smoothly sanded. This shutter is ready for paint or stain.

Specifications

Stiles: Full 2”; Top Rail: 2”
