Rogue Course Grain

Course Grain Fir Doors

At Rogue Valley Door we slice our own veneers and then meticulously grade them to ensure only the highest quality fiber is used in our wood doors. In the past, only a small percentage of this wood could make the grade and pass our quality inspection. With a fresh approach we knew we could positively impact the environment, save a precious dwindling resource and make use of the stock that had small

BB444: NEW - Stocked in 3-1/2" in Poplar

## Shipping Updates due to Covid-19

Many of our manufacturers are struggling with production and lack of employees.

Here is a current list of suppliers:

Schlage: Factory orders are 9 weeks on F,FC,B orders and 4 weeks on J series

Rogue Doors: Glass supplier for Rogue has added one week to their delivery time. Our quoted delivery has a cushion built in and this one week delay will not affect most orders.

HBG is experiencing a large surge in orders. They have had to close a couple of their production facilities temporarily due to Covid 19 exposure. This and a large order file, is causing a delay in delivering product. They expect this to be a continuing issue through August. The following is

blemishes and minor imperfections.

The result is Coarse Grain Fir doors, a new upcycled Rogue Valley Door product. We take those naturally occurring imperfections found in wood and create a unique treatment for these small blemishes and minor defects, resulting in a perfect match for distressed or weathered design. These doors are a perfect fit for your Cabin, Lodge, Mountain Retreat or anywhere you are trying to create a warm old meets new look.

#### [Brochure](#)
