## The Most Versatile Building Code Compliant Rail System Available!

HB&G has collaborated with builders and architects to develop the most versatile and natural-looking synthetic rail system that is perfect for porch and deck applications. Often mistaken for wood, our low maintenance synthetic rail is made from cellular PVC with aluminum stiffeners for strength. PermaRail Plus™ Railing is prefinished white, insect and weatherproof and comes with a 25 year warranty.

The PermaRail Plus™ Level-Loc™ and Rake-Loc™ rail attachment brackets used with aluminum stiffeners have been specifically engineered to securely attach the building code compliant railing to a newel, porch post, column or structure. The PermaRail Plus™ newel sleeve can be installed over an existing 4x4 or our Newel-Loc™ post mount system. The newel system is ideal for both residential and commercial applications, and it's strong enough to meet [IBC and IRC codes](#) (CCRR – 0262). The Newel-Loc™ post mount system includes both concrete and wood/composite porch and deck mounting hardware. The Newel-Loc™ post mount system is designed for all residential and commercial environments (including coastal applications).

### BUILDING CODE COMPLIANCE

PermaRail Plus™ has been tested to the appropriate standards and found to be build code compliant (CCRR-0262) as follows:

Decorative Top Rail System				Standard Top Rail System			
	Level	Rake			Level	Rake	
IRC	up to 12'	up to 8"		IRC	up to 8'	up to 8"	
IBC	up to 10'	up to 8"		IBC	up to 8'	up to 8"	

Review your application to ensure intended use complies with all applicable building codes.

\* Building code testing only applies to the square balusters.
