Bessler Sliding Stairway

Bessler sliding stairways are being discontinued as a key supplier for one of the components has shut down.

Product availability is subject to stock on hand. Most replacement parts will not be available. We continue to offer a wide range of folding stairs.

Smart Column by HB&G

A new seamless fiberglass sleeve for pressure treated wood posts (not included)

SmartColumn is a sleeve that is attached to a wood post **before** the post is installed on the porch. The cap & base are packaged with the sleeve and can be installed by sliding up & down before the post is set. Everything required is in one package. The sleeve can be attached to the post with either nails (nail-gun PSI 100) or screws (pre-drill first).

HB&G is looking to launch this product in July.
