Stairtrends

## StairTrends Update

Effective May 1st, we have new tread, starting step, stair hardware, stair moulding and rosette pricing. [Download PDF](#) for the new list prices. Note this discount will be the same as February's railing update.

For an excel spreadsheet showing your costs please contact our office.

## Coming soon

Effective June 1st we will have new mouldings, boards and Section B hardware pricing. An advance copy of these price lists will be available later this month or early May. A new discount sheet will also be introduced at that time.

## FlexFX

[The FlexFX Cable Program](#) - a simple and flexible railing fitting option that improves any view and makes your living space look and feel larger. The FlexFX Railing allows you to incorporate the same fittings from RailFX® into any residential railing application with ease. Ideal for both interior and exterior projects, our FlexFX stainless steel fittings and cable are perfect for decks, docks, balconies and stairways that use wood posts, metal posts or composite sleeves. Made in the USA with pride!

---

### Emtek Concealed Screws:

CF Mechanism orders will now be assembled and shipped to fit a standard door thickness of 1-3/8". Please specify if thicker to ensure a proper fit.

### Glad you asked....

Q. Recently a customer asked if the priming gaps in some HBG caps and bases are something to be concerned about.

A. The caps and bases are actually not primed. what you see in the picture is the "release agent" that is used to pull the item out of the mold. Finishing instructions are to lightly sand using a fine grit sandpaper before priming and painting.

### RailFX

[Aluminum Railing Systems](#) deliver an all-in-one solution for any project. Our team of experts make sure you are taken care of at every step.

- Up to 5' Post Spacing
