PermaLite® Lightweight Columns

[PermaLite®](#) columns are a cost-effective, load bearing, and versatile option. PermaLite® is available in plain square with several different cap and base styles. Recessed PermaLite is discontinued.

PermaLite® columns have the same structural benefits at almost 1/3 of the weight of our PermaCast® columns. They come ready to prime and paint with a Limited Lifetime Warranty. PermaLite size availability has changed. They are available in 6", 8" and 10" widths with heights up to 10'. There remain some 12" wide columns in PermaLite. Please check with our office for price and availability.

Fypon 2024

Fypon will be implementing a price increase of 5.0% on all Fypon products on April 1, 2024. Fypon is also implementing changes to their "Made to Order" product lead times. "Made to Order" products will have an approximate 4 week lead time and are designated in the Fypon 2024 price book. Custom product lead-times will be as shown on the quote. Note if you request a drop shipment and need a lift gate there will be a \$250 fee in addition to any freight cost if your order does not meet the minimum. The lift gate charge would apply even if the order meets pre-paid freight.

The 2024 revised [project estimate tool](#) is now available. Please contact our office to confirm the discounts that you will need to enter into the spreadsheet to obtain your cost.
